

Healing Himalayas LLP

An Introduction

ABOUT US

We are an environmental consulting and implementation agency offering end-to-end solid waste management solutions tailored to urban and rural needs. Our approach combines strategic planning, infrastructure development, and on-ground execution to help institutions, local bodies, and communities transition toward a circular economy.

From waste audits, IEC campaigns, and ESG compliance to setting up MRFs, composting systems, and recycling facilities, we deliver innovative and practical solutions to address growing waste challenges. Through data-driven methods and creative outreach, we aim to create cleaner, sustainable ecosystems with measurable impact.

Our Partner

HEALING HIMALAYAS

We are proud to partner with Healing Himalayas Foundation, a leading **non-profit organization** working to protect the Himalayan ecosystem through sustainable waste management. Their grassroots experience supports our shared goal of impactful, scalable environmental solutions.

VISION

To lead the transition to a zero-waste, circular economy by providing integrated waste management and sustainability solutions across communities, corporations, and governments.

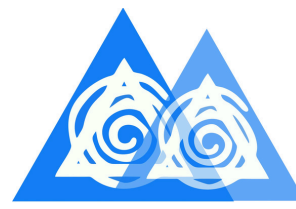

MISSION

To offer innovative, end-to-end solid waste management solutions through expert consulting, on-ground implementation, and technology-driven awareness, while supporting environmental resilience and community well-being.

MEET OUR TEAM

Shubha Tiwari

(Designated Partner)

An experienced research professional with a deep passion for environmental sustainability and climate protection, working towards solid waste management in advancing lifestyle

Pradeep Sandwan

(Designated Partner)

A pioneering environmental leader, focused on protecting the Himalayan ecosystem from waste pollution and climate impacts

OUR SERVICES

1. End-to-End Solid Waste Management Solutions

We provide complete consultancy and implementation services including waste audits, door-to-door collection systems, IEC campaigns, and MRF operations in collaboration with local administrations and CSR partners.

2. Environmental Consulting & ESG Compliance

We support corporates and institutions in meeting sustainability goals, ESG regulations, and Extended Producer Responsibility (EPR) through customized frameworks and waste reduction strategies.

3. Sustainable Tourism & Educational Engagements

We promote eco-conscious travel in the Himalayas by offering clean-up treks, waste awareness tours, and community experiences for students, corporates, and family groups.

OUR SERVICES

4. Residential & Urban Waste Management Models

We implement daily waste collection, composting, and awareness programs in residential societies, ensuring efficient segregation, processing, and compliance with municipal rules.

5. Innovative Recycling & Upcycling Facilities

Through MRFs, Plastic Polymer Recycling, and Textile Recovery Units, we process and upcycle waste into eco-friendly consumer products that contribute to the circular economy.

6. Green Product Development & Brand Building

We are building a consumer-facing brand offering upcycled goods made from Himalayan waste—turning environmental responsibility into everyday lifestyle choices.
